1. The CKD plant at Blansko is engaged primarily in the production of such machine tools as lathes, milling machines, turning machines, etc. Many new buildings have been erected in Blansko along the Punkva Brook in the direction of the Macocha grottoes. The buildings are four to five stories high and 20 to 30 meters long. They are painted with camouflage paint.
2. New assembly halls in which unidentified parts used by the V. I. Lenin Works in Pilsen are manufactured have also been built in Blansko.
